RDR (Remote Door Release)

Visibell RDR (Remote Door Release)

The RDR unit allows entry to a caller through your front door from the comfort of your armchair via a remote controlled key-fob. The unit is simple to fit and can be fitted within an hour. The system was designed to complement the Visibell Doorbell Camera but can work with any other CCTV camera or door access unit.

- Opens your front door from the comfort of your armchair using remote control key-fob.
- Buzzes to tell the caller to push the door, allowing them entry.
- Does not interfere with the normal operation of the existing lock.
- Works up to 50 feet/20m.
- Simple plug in connections.
- Extra key-fobs available.
- Complements the Visibell Doorbell Camera or any other CCTV system.
- Ideal for the elderly and disabled.
- Full instructions supplied (also technical helpline available).
- The lock release works with most Yale type rim-locks (call if in doubt).

1 Caller Presses Doorbell

2 Chime Sounds

3 Caller is automatically displayed on the TV

4 To allow entry press the remote keyfob

5 The control unit decodes the signal

6 The lock is then released

NOTE: Points 1 - 3 show how the Visibell Doorbell Camera works. This product is sold separately from the RDR kit.
